CONSTRUCTION PROJECTS IN SSF

201 -219 GRAND AVENUE (ROEM Developments)

There are daily material deliveries scheduled, and additional truck traffic is expected. The contractor will maintain access to Cypress Avenue between 3rd Lane and Grand Avenue. The traffic flaggers will assist the truck driver's delivery of materials. Commuters can expect a 3–5-minute delay as materials are offloaded and safely brought onto the site. The sidewalk along Cypress Avenue directly in front of the project is closed, and detour signs have been posted.

The contractor is tentatively scheduling frontage improvements along Grand Avenue to start in April. When work resumes, the sidewalk will be closed as work is underway, and parking impacts can be expected for the stalls directly in front of the project. Pedestrian detour signage will be deployed, noting the safe path of travel. Please always follow the signs and safety personnel instructions.

418 LINDEN AVENUE (ROEM Developments)

Daily material deliveries are scheduled, and additional truck traffic is expected. The contractor will maintain access to Linden Avenue and Lux Avenue. Drivers can expect minor delays. Construction flaggers will be deployed during material deliveries to help support vehicular travel. The sidewalk on Linden Avenue and Lux Avenue is open to pedestrians. Please always follow the signs and safety personnel instructions.

CIVIC CAMPUS: LIBRARY, PARKS & RECREATION AND COMMUNITY THEATER/COUNCIL CHAMBERS (1010 El Camino Real)

Daily material deliveries are scheduled, adding additional truck traffic along Antoinette Lane and Chestnut Avenue between 7:00 a.m. and 5:00 p.m. The Antoinette Lane sidewalk along the project frontage is closed. Pedestrians are encouraged to use the sidewalk across the street in front of the new Police Operations & 911 Dispatch Center. Detour signs are posted to guide pedestrians to a safe path of travel.

Domestic water line installation work resumes on Monday, April 10, along Chestnut Avenue at Antoinette Lane. Work will reduce westbound Chestnut Avenue to a single lane between 9:00 a.m. and 3:00 p.m. daily between Mission Boulevard and Antoinette Lane. Sidewalks will remain open throughout the construction process.

Sidewalk work along El Camino Real between Chestnut Avenue and Arroyo Drive is tentatively scheduled to start in late April. The job entails the replacement of the sidewalk, and as a result, this will not be available for use. Detour signage will be deployed, noting the safe path of travel around the impacted section. Minor impacts are expected to northbound El Camino Real between 9:00 a.m. and 3:00 p.m. as the shoulder/merge construction crews will take over a lane. Please always follow the signs and safety personnel instructions

Westborough Park Pathways Replacement Project

Work continues at Upper Westborough Park. Work is scheduled to be complete by early Summer (weather permitting). The upper area of the park around the ballfield will remain closed during this period. Additionally, the replacement of a spur near the tennis courts will necessitate that the courts be temporarily closed for approximately two weeks of the project.

The Alice Bulos Community Center, picnic areas, playgrounds, lower park restrooms, basketball court, and preschool will remain open.

For project-related questions or concerns, please email Joshua Richardson (Parks Manager) at Joshua.Richardson@ssf.net.

580 Dubuque Avenue (north of the Caltrain Station)

The contractor continues installing water services for the project, impacting Dubuque Avenue in both the northbound and southbound directions. Work is occurring daily, Monday through Friday (weather permitting). **Work will reduce Dubuque Avenue to a single lane managed by traffic flaggers between 7:00 a.m. and 3:00 p.m. daily.** Access to the Caltrain station and parking lot will always be maintained. Commuters can expect delays and are encouraged to use alternate routes. Construction flaggers will be deployed to help keep vehicular travel. Please always follow the signs and safety personnel instructions.

Smart Corridors Expansion Project

The Smart Corridor Expansion project is a joint effort by the City and Caltrans to develop a traffic management system along key arterial corridors that parallel US-101 and I-380. The Smart Corridor program provides public agencies the tools to safely manage traffic congestion through local streets during normal operating conditions, major freeway incidents, and special events.

The project stretches along the following:

1. Airport Blvd: US-101 (City limit) to Terminal Ct.
2. South Airport Blvd: Road 21 to Mitchell Ave.
3. Gateway Blvd: Mitchell Ave to Oyster Point Blvd.

Work will proceed daily (Monday through Friday). Some work will be performed at night to alleviate possible congestion resulting from this work. Upcoming daytime traffic impact areas may include:

1. Corporate Drive & Gateway Blvd (just south): single lane impacts
2. Corporate Drive & Gateway Blvd (just north): single lane impacts
3. Corporate Drive & Gateway Blvd (north; closer to first Genentech Driveway): single lane impacts
4. Genentech Driveway #2 & Gateway Blvd: single lane impacts
5. Genentech Driveway #3 & Gateway Blvd: single lane impacts

Commuters can expect delays and are encouraged to use alternate routes.

Hillside Boulevard Road Diet Improvement Project

Roadway improvement work continues along Hillside Boulevard between Lincoln Street and Lawndale Boulevard. Work includes curb ramp replacement, traffic signal work, paving, and restriping. Work is proceeding daily (Monday through Friday). **Hillside Boulevard will be reduced to a single lane in each direction during work hours (weather permitting).**

Work will occur as follows:

- Westbound Hillside Boulevard: 7:00 a.m. to 4:00 p.m.
- Eastbound Hillside Boulevard: 9:30 a.m. to 4:00 p.m.

Commuters can expect delays and are encouraged to use alternate routes. Construction flaggers will be deployed to help maintain vehicular travel. Please always follow the signs and safety personnel instructions.

Grand Avenue & Airport Boulevard Streetscape Improvement

Streetscape improvement work at the intersection of Grand Avenue and Airport Boulevard continues. Work will improve all four corners of the intersection, including the medians. Work is being phased to minimize impacts, but due to the nature of the work, traffic control measures will remain up

24/7. Current work is scheduled on the southwest corner (gas station side) and northeast corner (close to US-101). Work will result in single-lane closures impacting both the northbound and southbound travel along Airport Boulevard and eastbound travel at Grand Avenue. This first phase is tracked to complete by the end of April (weather permitting). Delays are expected. Commuters are encouraged to use alternate routes. Construction flaggers will be deployed to help maintain vehicular travel when necessary. Pedestrian detour signage will be deployed, routing pedestrians around work zones. Please always follow the signs and safety personnel instructions.
