Presentation regarding update on the City of South San Francisco's investment portfolio (Frank Risso, Treasurer, Karen Chang, Director of Finance, Carlos Oblites, Chandler Asset Management)

#### **RECOMMENDATION**

#### Staff recommends City Council receive a presentation on the investment portfolio.

#### BACKGROUND/DISCUSSION

California Government Code Section 53600 et seq., strictly governs the investment activities related to public funds. Code provides guidance and restrictions related to permitted investment sectors, concentration limits, minimum credit quality, and maximum maturities permitted. Public agencies may only invest in fixed income securities. The purchase of stock is prohibited. Therefore, the City primarily invests in highly rated debt securities such as U.S. Treasury obligations, federal agency and government sponsored enterprise debt, as well as obligations issued by high credit quality, non-governmental entities such as corporations, and issuers of passthrough securities, and supranational issuers.

California Government Code also specifies that the investment objectives of public agency investment programs shall be safety, liquidity, and return, in that order. As such, the safety of principal is the foremost objective of the City's investment program. The investment program must remain sufficiently liquid to enable the City to meet all cash requirements. The City collaborates with its registered investment advisor, Chandler Asset Management, in managing the City's funds. The City's investment program totals nearly \$352 million, of which Chandler Asset Management currently manages \$272 million. The Chandler-managed portion comprises the City's Mid-Term Portfolio targeting a duration of 2.76 years (\$200,593,548), Limited Maturity Portfolio, which is structured to achieve competitive yields for a portion of the City's most liquid funds (\$65,818,779), and a smaller Pension Reserve Portfolio (\$5,847,635). The remainder comprises cash and investments held in Local Agency Investment Fund (LAIF), the State Treasurer's investment pool for California local governments.

The City's investment program remained safe and liquid during the past year. The portfolio's large allocation to US Treasury and Agency securities continues as a buffer to other markets with their strong liquidity characteristics. Chandler will continue to evaluate and monitor all portfolio holdings.

#### FISCAL IMPACT

There is no fiscal impact in receiving this presentation.

#### **RELATIONSHIP TO STRATEGIC PLAN**

The investment portfolio is consistent with the City's Priority Area 3, Financial Stability.

#### CONCLUSION

The Investment portfolio is in compliance with the California Government Code and the City's Investment Policy.

The City has sufficient cash and investments to meet its obligations over the next six months.

The U.S. economy added 206,000 jobs in June, remaining ahead of consensus expectations of 190,000 jobs. The gains were broad based, with government, health care, and social assistance posting the largest gains. The three-month moving average and six-month moving average payrolls have weakened from the first quarter to 177,000 and 222,000 respectively. The unemployment rate edged up to 4.1% in June, and the labor participation rate inched up to 62.6%, remaining below the pre-pandemic level of 63.3%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons held steady at 7.4%. Average hourly earnings rose 3.9% year-over-year in June, down from 4.1% year-over-year in May. The labor markets continue to show signs of cooling in line with the Federal Reserve's view that there has been "substantial" progress towards better balance in the labor market between demand and supply for workers.

In May, the Consumer Price Index (CPI) remained unchanged month-over-month and rose 3.3% year-over-year, reflecting broad-based cost reductions. The Core CPI, which excludes volatile food and energy components, was up 0.2% month-over-month and 3.4% year-over-year in May, down from 3.6% in April and lower than expected. The Personal Consumption Expenditures (PCE) Index decelerated in May as expected. The headline PCE deflator was unchanged in May from April versus up 0.3% in the prior month. Year-over-year, the PCE deflator rose 2.6%. The Core PCE deflator (the Fed's preferred gauge) increased 0.1% in May from the prior month versus up 0.3% in April. The Core PCE deflator also rose 2.6% year-over-year, still above the Fed's 2% inflation target. Much of the lingering inflation has been driven by shelter costs and demand for services.

# **OBJECTIVES**

So San Francisco Cons Portfolio | Account #10061 | As of June 30, 2024

### InvestmentObjectives

The City of South San Francisco's investment objectives, in order of priority, are to provide safety to ensure the preservation of capital in the overall portfolio, provide sufficient liquidity for cash needs and a market rate of return consistent with the investment program.

### Chandler Asset Management Performance Objective

The performance objective for the portfolio is to earn a total rate of return through a market cycle that is equal to or above the return on the benchmark index.

### Strategy

In order to achieve these objectives, the portfolio invests in high quality fixed income securities consistent with the investment policy and California Government Code.

### **IMPORTANT DISCLOSURES**

So San Francisco Cons Portfolio | Account #10061 | As of June 30, 2024

2024 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Source ICE Data Indices, LLC ("ICE"), used with permission. ICE permits use of the ICE indices and related data on an "as is" basis; ICE, its affiliates and their respective third party suppliers disclaim any and all warranties and representations, express and/or implied, including any warranties of merchantability or fitness for a particular purpose or use, including the indices, index data and any data included in, related to, or derived therefrom. Neither ICE data, its affiliates or their respective third party providers guarantee the quality, adequacy, accuracy, timeliness or completeness of the indices or the index data or any component thereof, and the indices and index data and all components thereof are provided on an "as is" basis and licensee's use it at licensee's own risk. ICE data, its affiliates and their respective third party do not sponsor, endorse, or recommend chandler asset management, or any of its products or services.

This report is provided for informational purposes only and should not be construed as a specific investment or legal advice. The information contained herein was obtained from sources believed to be reliable as of the date of publication, but may become outdated or superseded at any time without notice. Any opinions or views expressed are based on current market conditions and are subject to change. This report may contain forecasts and forward-looking statements which are inherently limited and should not be relied upon as indicator of future results. Past performance is not indicative of future results. This report is not intended to constitute an offer, solicitation, recommendation or advice regarding any securities or investment strategy and should not be regarded by recipients as a substitute for the exercise of their own judgment.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.
