

Community Meeting #2 Summary

Centennial Way Trail Improvements

Date: December 8, 2022
Time: 6:00 – 7:30 PM
Location: Municipal Services Building – Council Chambers

STICKER VOTES

Meeting attendees placed stickers on images to answer the following question.

Which type of public art would you like to see installed at the project site?

Public Art Type	Votes
Skate Ramp Mural	0
Skateable Sculpture	4
Artistic Bench	3
Art Emblems on the Screen Feature	0
Stair Risers Mosaic	1
Seatwall Mosaic	1
Pavement Mosaic	1
Art Sculpture	1

OTHER COMMENTS

The following comments were provided by meeting attendees.

General Comments

1. Provide more seating opportunities.
2. Consider adding an additional crosswalk across Spruce Avenue aligned with the northern trail head, so there will be two crosswalks instead of one.
3. Explore whether a soccer field could be provided.
4. Determine if the County facility adjacent to the park area could be utilized for public parking.
5. Provide supplemental lighting for the new park features.
6. Consider providing a restroom nearby.
7. Ensure the play equipment is easy to maintain.
8. Consult the International Mountain Bicycling Association about the design for the bike park.
9. Functional art could include path murals or other artistic elements that urge trail users to slow down or stay in a designated space/lane.
10. The flower or element that each interpretive panel is describing should be planted nearby to allow for visual learning.

Skate Plaza Comments

Overall

1. Consider expanding the footprint of the ramp closest to the bike park entrance and eliminate the planting area.
2. Provide lighting until 10 PM daily.
3. Lights should face the trail and skate plaza.
4. Consider adding benches in the planting areas.
5. Consider adding a drinking fountain.
6. Provide some shade.

View 1

1. Move the curved ledge next to the bank on the center platform.
2. Consider adding a handrail.

View 2

1. The ledge nearest the trail should be shorter, so one could ollie over it to grind or slide.
2. Ledges on the center platform should be different heights.
3. Put a small hubba on the edge of the stairs at the center platform.

View 3

1. Consider removing the pipe in the middle of the quarter pipe.

View 5

1. The rail in the center of the plaza could become a flat bar.

View 6

1. Could add pool coping on the top of the large ramp.
2. Angled ledge should be 90 degrees instead.
3. Convert A-frame ledge to a flat manual pad.
4. Consider filling the planting area near the trail with concrete instead of it being planting.
