

# South Linden Avenue & Scott Street Grade Separation Planning Study

Community Meeting No. 1

August 16, 2018

# Agenda

- Welcome & Introduction
- Project Background & Purpose
- Project Overview
- Q & A
- Stations
- Next Steps

South Linden Avenue and Scott Street Grade Separation Planning Study

# Meet the City Representatives

## ■ City of South San Francisco

- Richard Cho
- Department of Public Works
- [engineering@ssf.net](mailto:engineering@ssf.net)
- (650) 829-6652

South Linden Avenue – City of South San Francisco

## ■ City of San Bruno

- Michael Kato
- Department of Public Works
- [ps@sanbruno.ca.gov](mailto:ps@sanbruno.ca.gov)
- (650) 616-7065

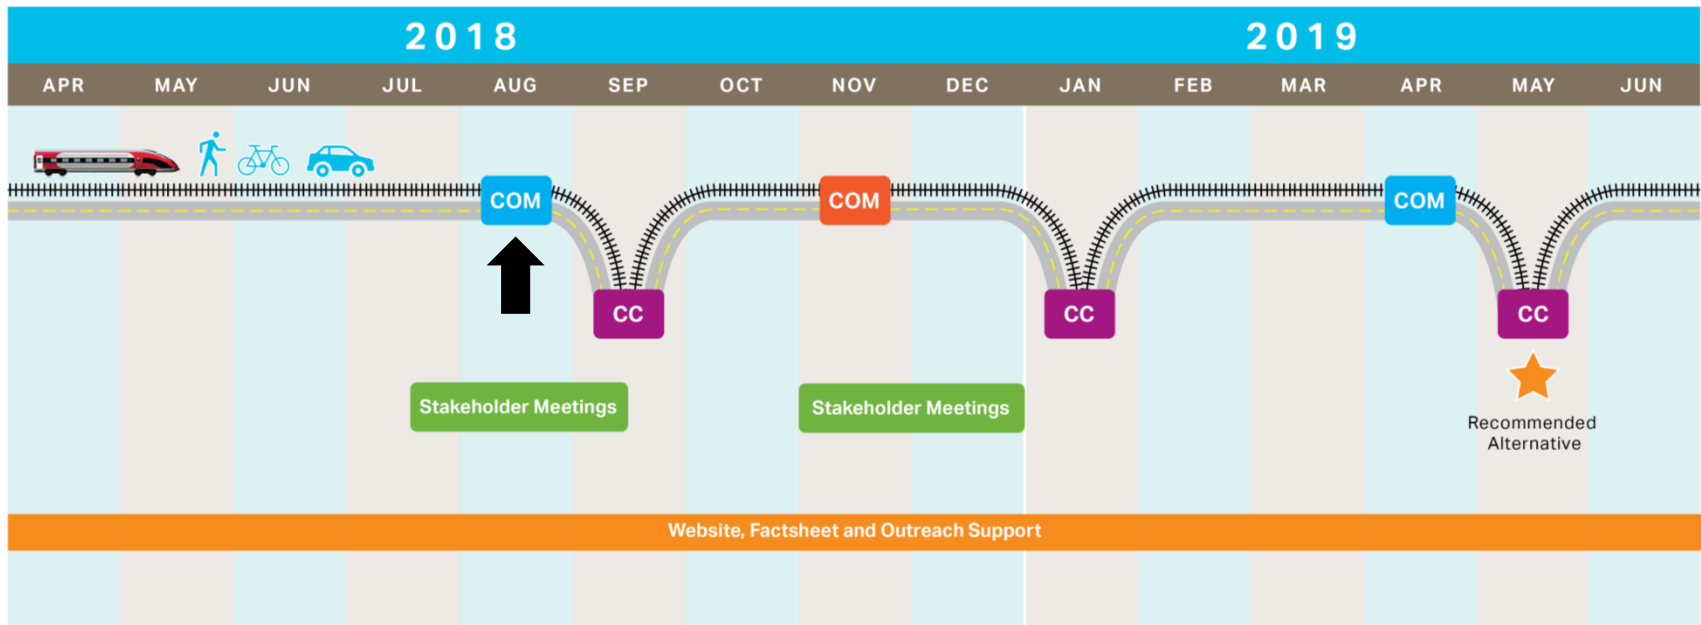

Scott Street – City of San Bruno

South Linden Avenue and Scott Street Grade Separation Planning Study

# Community Engagement Schedule

-  Combined City Community Meeting (2, with South San Francisco **and** San Bruno)
-  City Council Meeting (3 each per city)
-  Single City Community Meeting (1 each per city)
-  Recommended Alternative—Advance to Environmental Clearance
-  Today's Meeting

## South Linden Avenue and Scott Street Grade Separation Planning Study

# Goals for Tonight's Meeting

- Educate the public about the project
- Identify existing project features and constraints
- Answer questions
- Obtain your input about the alternatives

South Linden Avenue and Scott Street Grade Separation Planning Study

# What is an "at-grade crossing"?

A location where a roadway crosses the railroad tracks at the same level (elevation).

Linden Avenue

Scott Street

South Linden Avenue and Scott Street Grade Separation Planning Study

# Video at South Linden Avenue

*Click box below for video*

South Linden Avenue and Scott Street Grade Separation Planning Study

# What is a “grade separation”?

A bridge that allows the public to travel under (or over) the railroad.

Jefferson Avenue  
Redwood City

San Antonio Road  
Mountain View

South Linden Avenue and Scott Street Grade Separation Planning Study

# Lesson Learned from San Bruno Ave Grade Separation

- Early coordination with utility companies
- Open communication with residents and stakeholders
- Timeliness and responsiveness to inquiries during construction
- Community meetings in advance of major milestones

South Linden Avenue and Scott Street Grade Separation Planning Study

# Why is the Project Needed?

- Improve Traffic Circulation/Mobility
  - Reduce traffic delays caused by gate down times
  - Improve traffic flow across railroad crossing
- Increase Public Safety (vehicular, bicycle, and pedestrian)
  - Eliminates pedestrian, bicyclist and motor vehicle conflicts with the railroad... this eliminates the potential for accidents
  - Improve pedestrian and bicycle access

**Safer Facility + Less Congestion = *Higher Quality of Life***

South Linden Avenue and Scott Street Grade Separation Planning Study

# Weekday Train Traffic

## Total Number of Trains (per Weekday)

	Northbound (NB)	Southbound (SB)	Total
Caltrain (2018)	AM: 20 PM: 26 Total: 46	AM: 20 PM: 26 Total: 46	AM: 40 PM: 52 Total: 92
Caltrain (2022 Projection #)	57	57	114
High Speed Rail (2029 Projection +)	128 trains per day to/from San Francisco with an additional 24 trains starting at San Jose		
Union Pacific	3	3	6

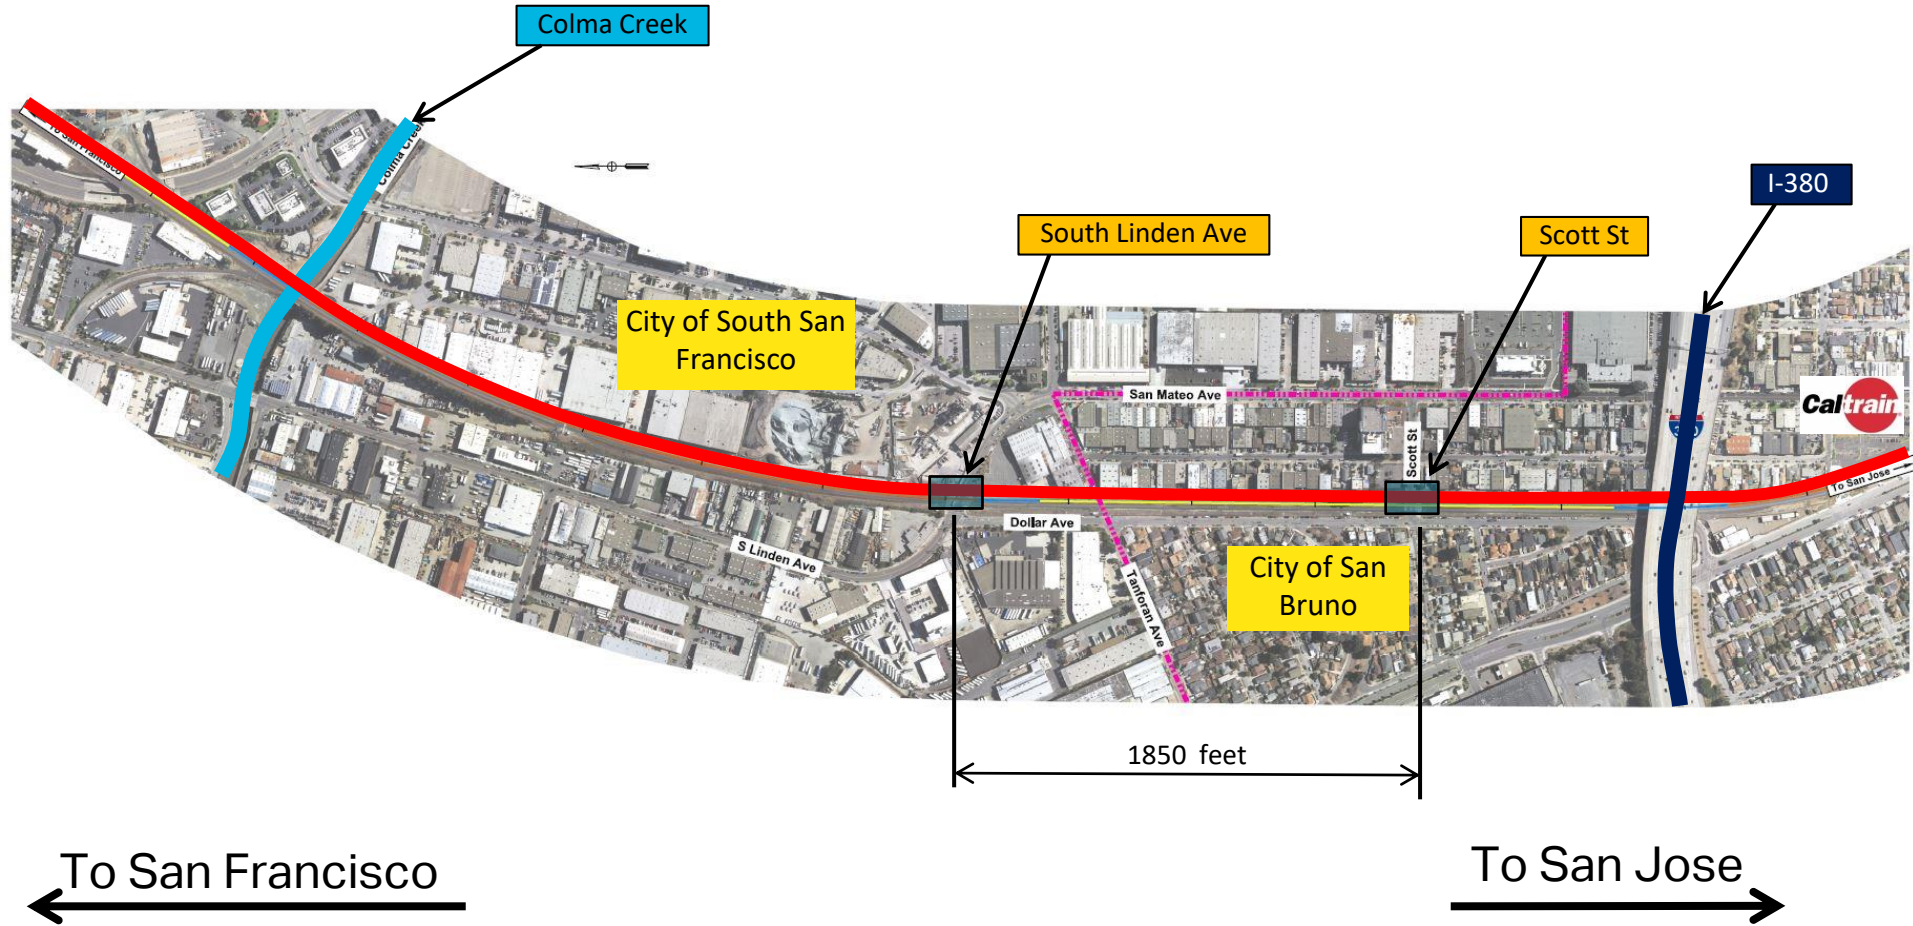

# 2022 Projected Values based on Completion of the Peninsula Corridor Electrification Project (from FEIR, December 2014) (Prototypical Schedule)

+ 2029 Projected Values based on Blended Service and Completion of the High Speed Rail Project and 2014 CHSRA Business Plan

### South Linden Avenue and Scott Street Grade Separation Planning Study

# Project Location Map

## South Linden Avenue and Scott Street Grade Separation Planning Study

# Options Studied, but Considered Infeasible

- Fully Raise Tracks over South Linden and Scott St
  - Physical constraints (I-380 viaduct to the south and Colma Creek to the north) do not allow the tracks to be raised fully.
- Fully Lower Tracks under South Linden Ave and Scott St
  - Physical constraints (Caltrain's San Bruno Station to the south and Colma Creek to the north) do not allow the tracks to be lowered fully.
- Vehicle Grade Separation at Scott St
  - Road profiles to achieve this require significant residential property impacts.
  - City of San Bruno is reconsidering previously adopted position that Scott Street remain open to vehicle traffic.

South Linden Avenue and Scott Street Grade Separation Planning Study

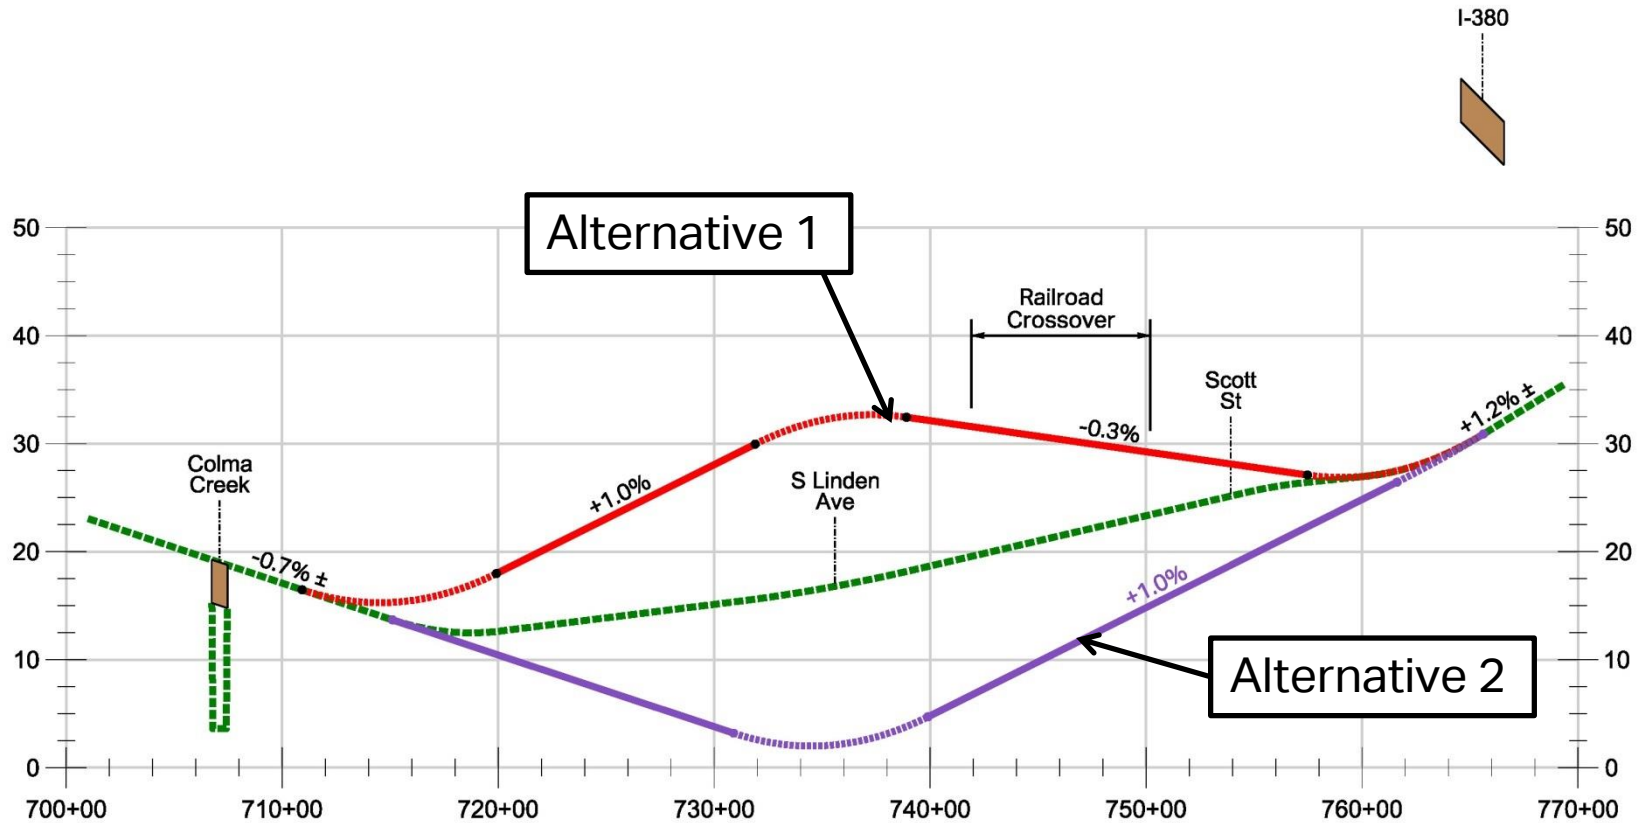

# Existing Railroad Profile

## South Linden Avenue and Scott Street Grade Separation Planning Study

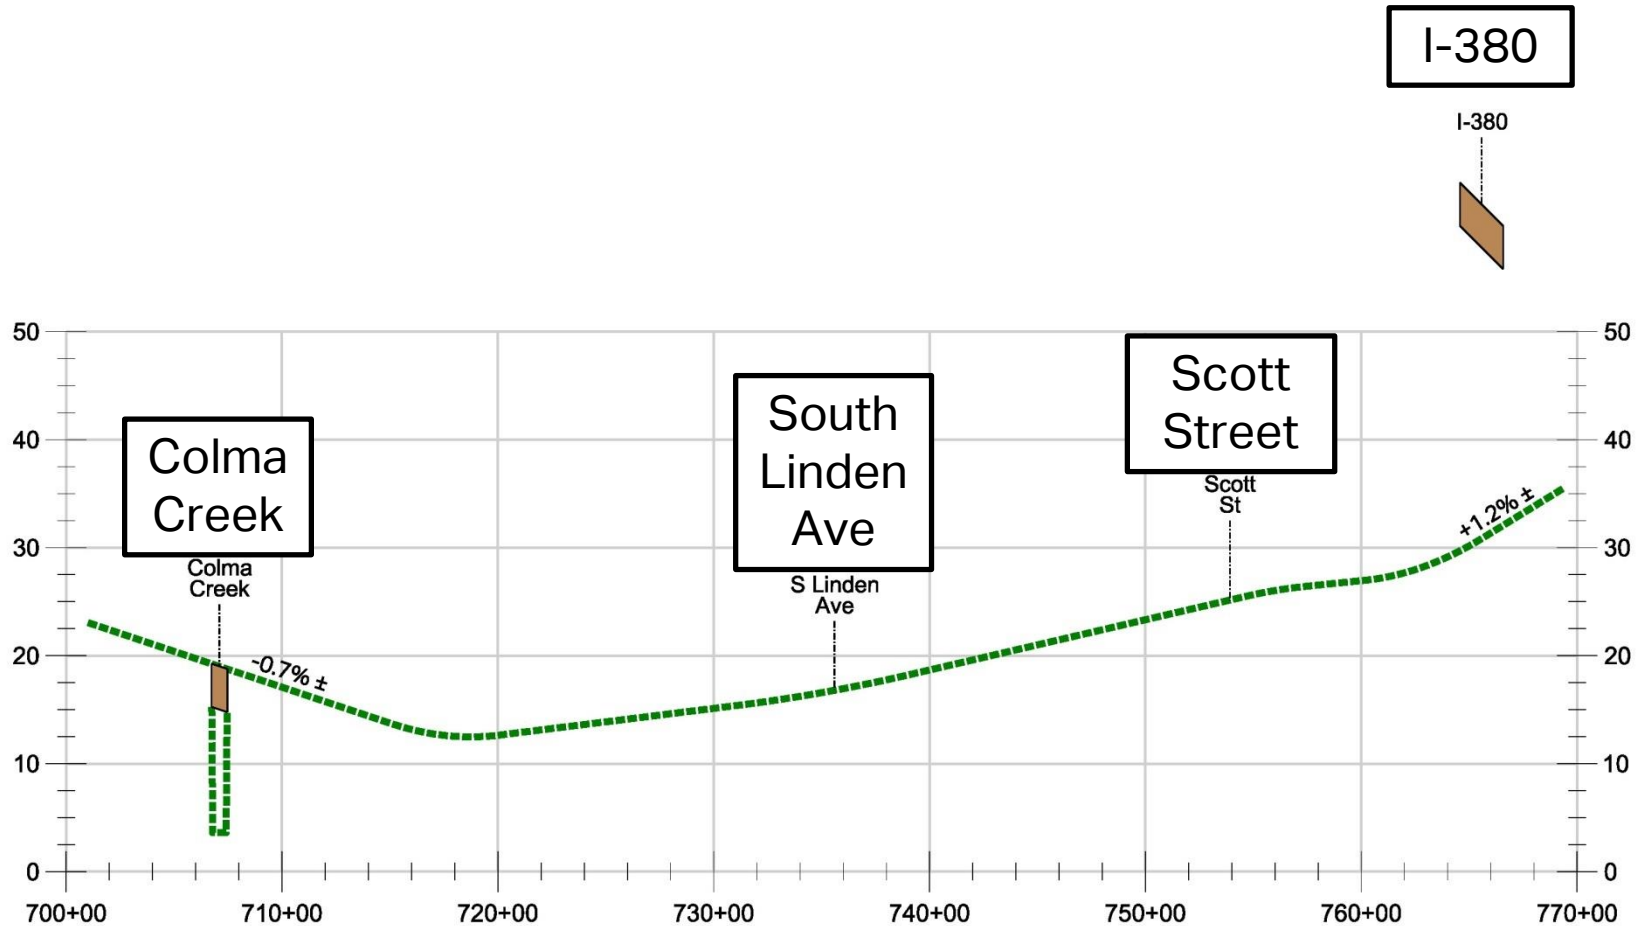

# Proposed Railroad Profiles (Alternative 1 and 2)

## South Linden Avenue and Scott Street Grade Separation Planning Study

# Existing Railroad Profile (Alternative 3 and 4)

## South Linden Avenue and Scott Street Grade Separation Planning Study

# Four Alternatives to Evaluate

## Alternative 1: Hybrid (Track Raised, Roadway Lowered)

**South Linden Avenue**

Rail Partially Elevated/Roadway Partially Lowered

**Scott Street**

Rail Partially Elevated with a Pedestrian/Bike Underpass

## Alternative 2: Hybrid (Track Lowered, Roadway Raised)

**South Linden Avenue**

Rail Lowered, Roadway Elevated

**Scott Street**

Rail Lowered with a Ped/Bike Overpass or Underpass

### South Linden Avenue and Scott Street Grade Separation Planning Study

# Four Alternatives to Evaluate

## Alternative 3: Rail at grade with Roadway Underpass

**South Linden Avenue**  
Rail at-grade, Roadway Lowered

**Scott Street**  
Rail at-grade with a **Ped/Bike Overpass or Underpass**

## Alternative 4: Rail at grade with Roadway Overpass

**South Linden Avenue**  
Rail at-grade, Roadway Elevated

**Scott Street**  
Rail at-grade with a **Ped/Bike Overpass or Underpass**

### South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 1: Hybrid (Track Raised, Roadway Lowered) South Linden Avenue Layout

**LEGEND:**

- Track
- Retaining Wall
- Right-of-Way
- Limits of Roadway Modifications
- Structure
- Driveway Impact

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 1: Hybrid (Track Raised, Roadway Lowered) South Linden Avenue Typical Section

South Linden Avenue and Scott Street Grade Separation Planning Study

# Hybrid Alternative

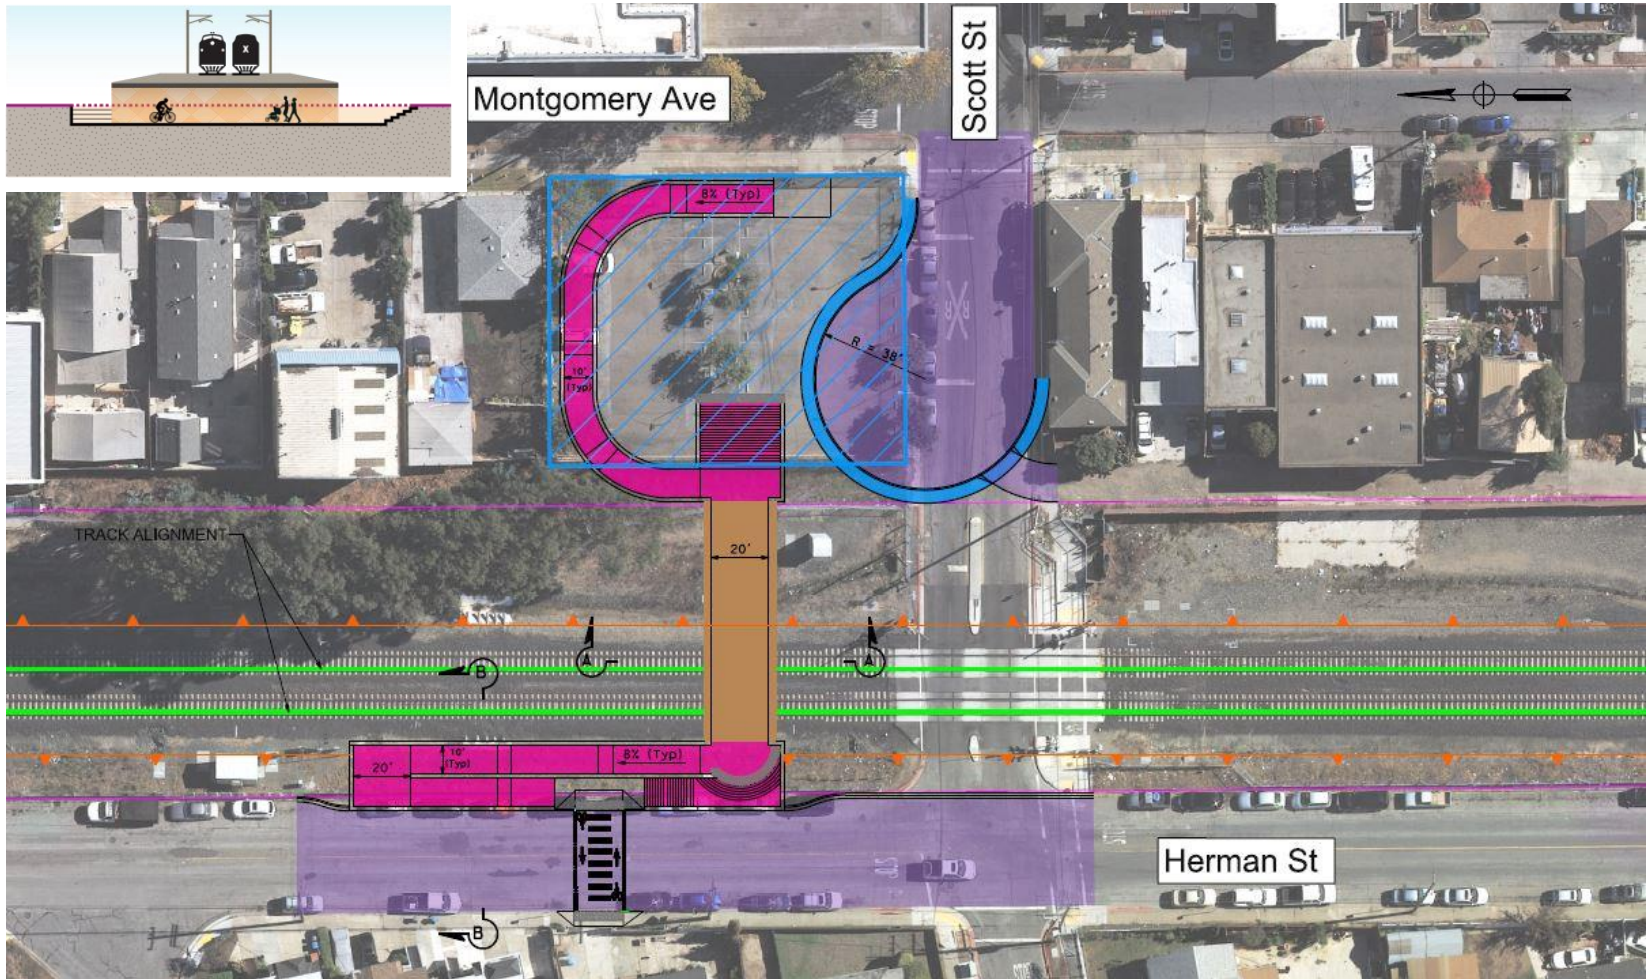

- Holly Street, San Carlos
- Issues
  - Long embankments
  - Raised tracks
  - Improved connectivity
  - Reduced impact to adjacent properties

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 1: Hybrid (Track Raised, Roadway Lowered) Scott Street Layout

South Linden Avenue and Scott Street Grade Separation Planning Study

# Pedestrian Undercrossings

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 2: Hybrid (Track Lowered, Roadway Raised)

## South Linden Avenue Layout

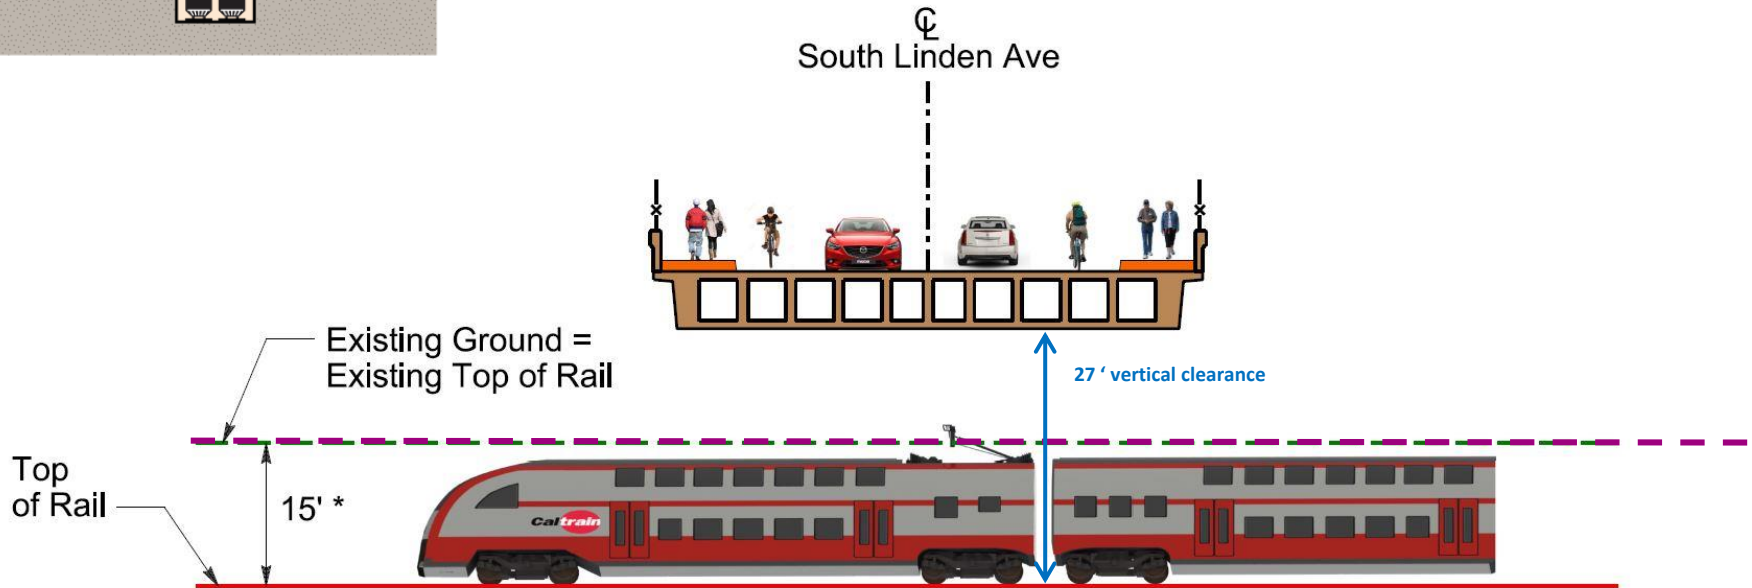

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 2: Hybrid (Track Lowered, Roadway Raised)

## South Linden Avenue Typical Section

\* Elevation difference between the proposed and existing top of rail at the centerline of South Linden Avenue

South Linden Avenue and Scott Street Grade Separation Planning Study

# Pedestrian Overcrossings

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 3: Rail at grade with Roadway Underpass

## South Linden Avenue Layout

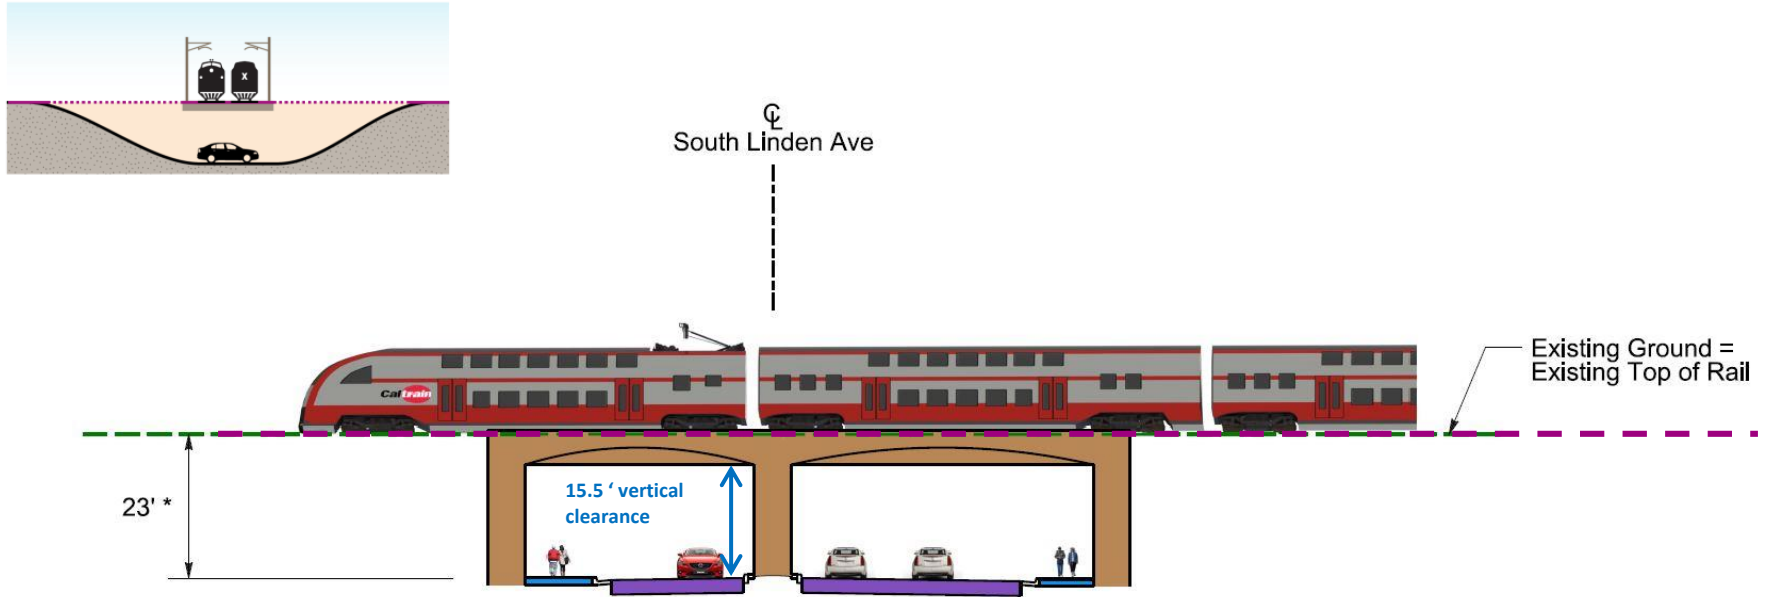

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 3: Rail at grade with Roadway Underpass

## South Linden Avenue Typical Section

\* Dimension from Top of Rail to Profile Grade at the Centerline of South Linden Avenue

### South Linden Avenue and Scott Street Grade Separation Planning Study

# Underpass Alternative

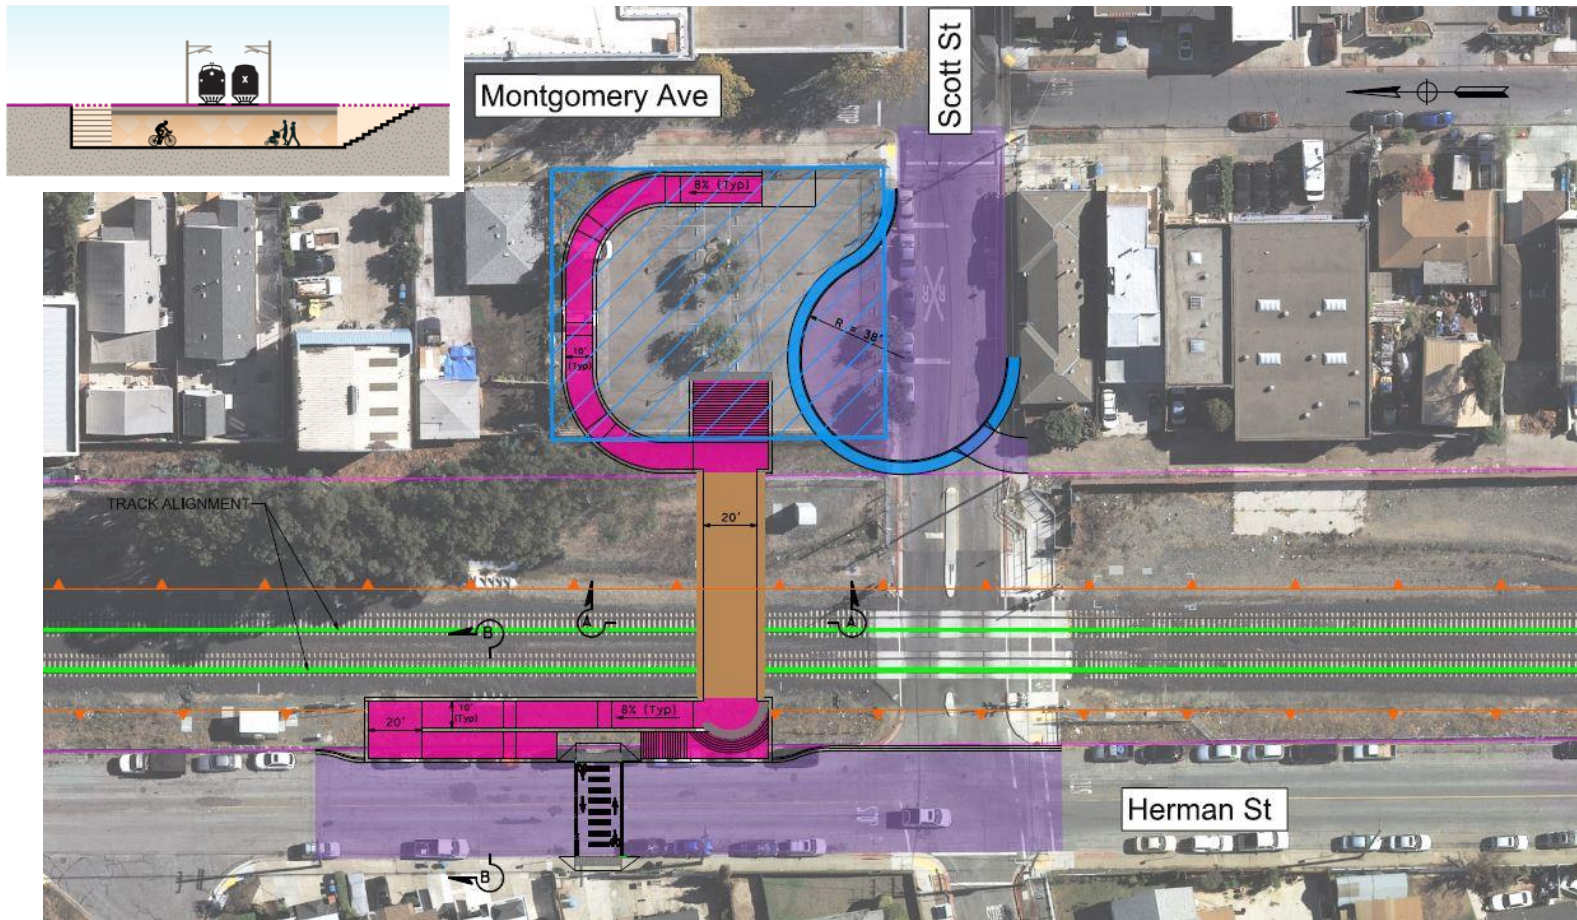

- Jefferson Avenue, Redwood City
- Issues
  - Retaining walls
  - Limits access to adjacent properties
  - Side street connectivity

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 3: Rail at grade with Roadway Underpass Scott Street Layout

South Linden Avenue and Scott Street Grade Separation Planning Study

# Pedestrian Undercrossings & Overcrossings

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 4: Rail at grade with Roadway Overpass

## South Linden Avenue Layout

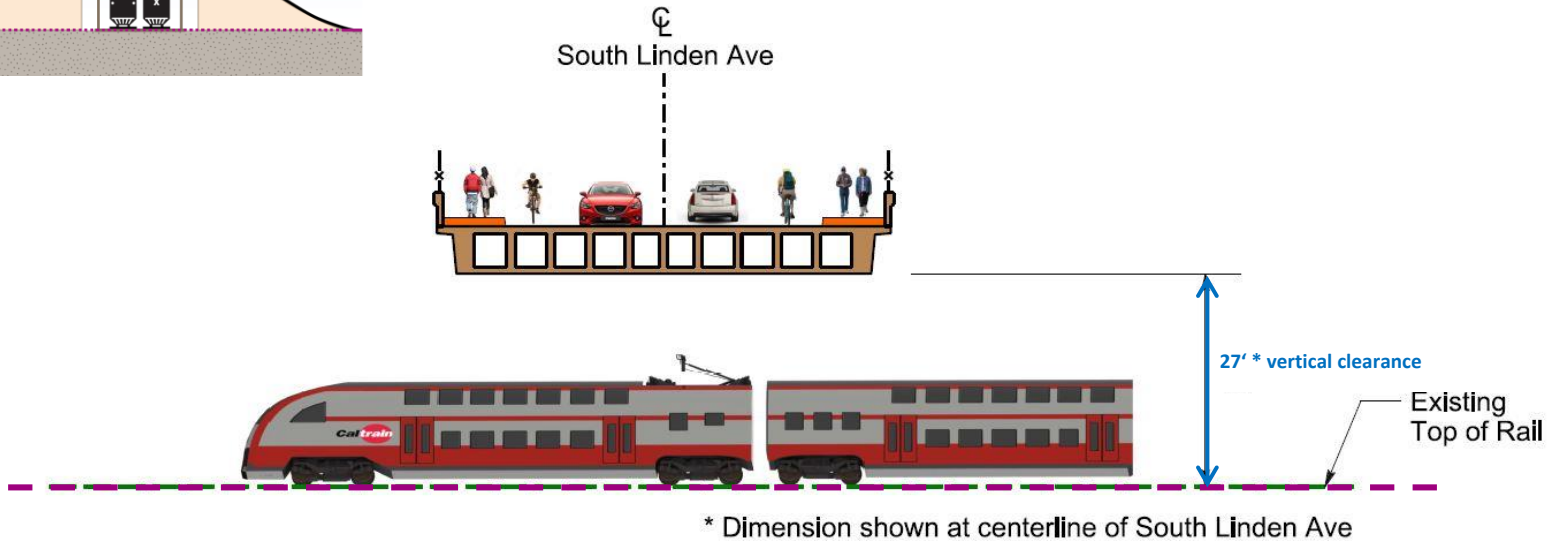

South Linden Avenue and Scott Street Grade Separation Planning Study

# Alternative 4: Rail at grade with Roadway Overpass

## South Linden Avenue – Typical Section

South Linden Avenue and Scott Street Grade Separation Planning Study

# Overpass Alternative

- San Antonio Road, Mountain View
- Issues
  - Requires 30 ft bridge
  - Overpass length: 1,100 ft
  - Requires raising El Camino Real
  - Major visual impacts
  - Largest footprint

South Linden Avenue and Scott Street Grade Separation Planning Study

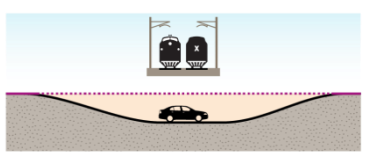

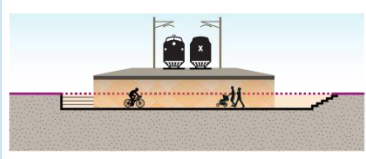

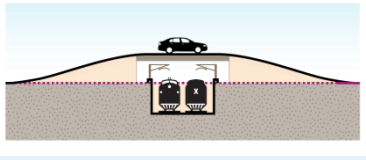

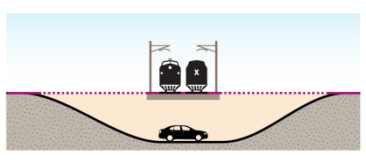

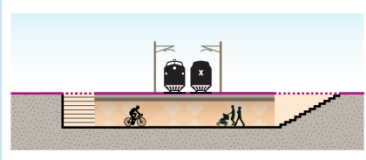

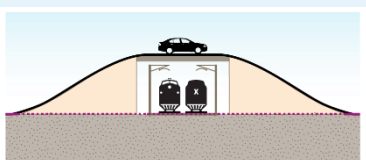

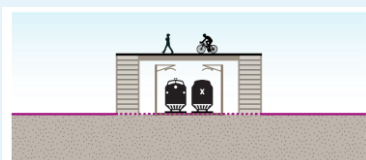

# Pedestrian Undercrossings & Overcrossings

South Linden Avenue and Scott Street Grade Separation Planning Study

# Summary of Alternatives

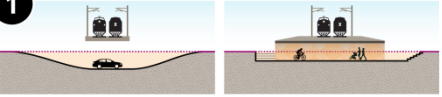

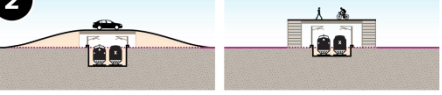

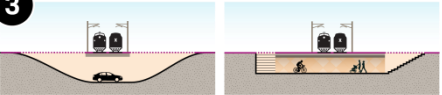

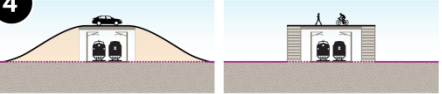

Alt	South Linden Avenue	Scott Street
1	 <ul style="list-style-type: none"> <li>▪ Rail Elevated</li> <li>▪ Roads Lowered</li> </ul>	 <ul style="list-style-type: none"> <li>▪ Rail Elevated</li> <li>▪ Road Closed</li> <li>▪ Ped/Bike Tunnel</li> </ul>
2	 <ul style="list-style-type: none"> <li>▪ Rail Lowered</li> <li>▪ Roads Elevated</li> </ul>	 <ul style="list-style-type: none"> <li>▪ Rail Lowered</li> <li>▪ Road Closed</li> <li>▪ Ped/Bike Crossing*</li> </ul>
3	 <ul style="list-style-type: none"> <li>▪ Rail At-Grade</li> <li>▪ Roads Fully Lowered</li> </ul>	 <ul style="list-style-type: none"> <li>▪ Rail At-Grade</li> <li>▪ Road Closed</li> <li>▪ Ped/Bike Crossing*</li> </ul>
4	 <ul style="list-style-type: none"> <li>▪ Rail At-Grade</li> <li>▪ Roads Fully Elevated</li> </ul>	 <ul style="list-style-type: none"> <li>▪ Rail At-Grade</li> <li>▪ Road Closed</li> <li>▪ Ped/Bike Crossing*</li> </ul>

\* A Ped/Bike Underpass (Tunnel) or an Overcrossing can be designed for this alternative

South Linden Avenue and Scott Street Grade Separation Planning Study

# Advantages & Disadvantages

Alternative	Advantages	Disadvantages
<p><b>1</b></p>  <p><b>South Linden Avenue</b> Rail Partially Elevated/ Roadway Partially Lowered</p> <p><b>Scott Street</b> Rail Partially Elevated with a Pedestrian/Bike Underpass</p>	<ul style="list-style-type: none"> <li>▪ <b>Least Property Impacts</b></li> <li>▪ <b>Lowest Cost (Probable)</b></li> </ul>	<ul style="list-style-type: none"> <li>▪ <b>Shoofly Required*</b></li> </ul>
<p><b>2</b></p>  <p><b>South Linden Avenue</b> Rail Lowered, Roadway Elevated</p> <p><b>Scott Street</b> Rail Lowered with a Ped/Bike Overpass or Underpass</p>	<ul style="list-style-type: none"> <li>▪ <b>Reduces Train Noise (Rail Elevation Lowered)</b></li> </ul>	<ul style="list-style-type: none"> <li>▪ <b>More Property Impacts than Alt 1</b></li> <li>▪ <b>Shoofly Required*</b></li> <li>▪ <b>High Cost</b></li> </ul>
<p><b>3</b></p>  <p><b>South Linden Avenue</b> Rail Partially Elevated/ Roadway Partially Lowered</p> <p><b>Scott Street</b> Rail Partially Elevated with a Pedestrian/Bike Underpass</p>	<ul style="list-style-type: none"> <li>▪ <b>Rail Remains At-Grade</b></li> </ul>	<ul style="list-style-type: none"> <li>▪ <b>More Property Impacts than Alt 1</b></li> <li>▪ <b>Limits Access to Adjacent Properties</b></li> <li>▪ <b>Greatest Impacts to Sidestreets</b></li> <li>▪ <b>Shoofly Required*</b></li> <li>▪ <b>High Cost</b></li> </ul>
<p><b>4</b></p>  <p><b>South Linden Avenue</b> Rail at-grade, Roadway Elevated</p> <p><b>Scott Street</b> Rail at-grade with a Ped/Bike Overpass or Underpass</p>	<ul style="list-style-type: none"> <li>▪ <b>Rail Remains At-Grade</b></li> <li>▪ <b>No Shoofly Required</b></li> </ul>	<ul style="list-style-type: none"> <li>▪ <b>Greatest Property Impacts</b></li> <li>▪ <b>Visual impacts</b></li> <li>▪ <b>High Cost</b></li> </ul>

**\* Shoofly will result in disruption to traffic on Dollar/ Herman during construction**

**South Linden Avenue and Scott Street Grade Separation Planning Study**

# Design Constraints/Considerations

- Design Requirements (Vertical clearance, etc.)
- Railroad Operations
- Right-of-Way & Utilities
- Accessibility (Elevation Change)
- Traffic Impacts
- Constructability
- General Visual Impact/Overall Aesthetics
- Construction Costs

South Linden Avenue and Scott Street Grade Separation Planning Study

# Questions and Answers

# Stations

- South Linden Avenue
- Scott Street
- Infeasible Options

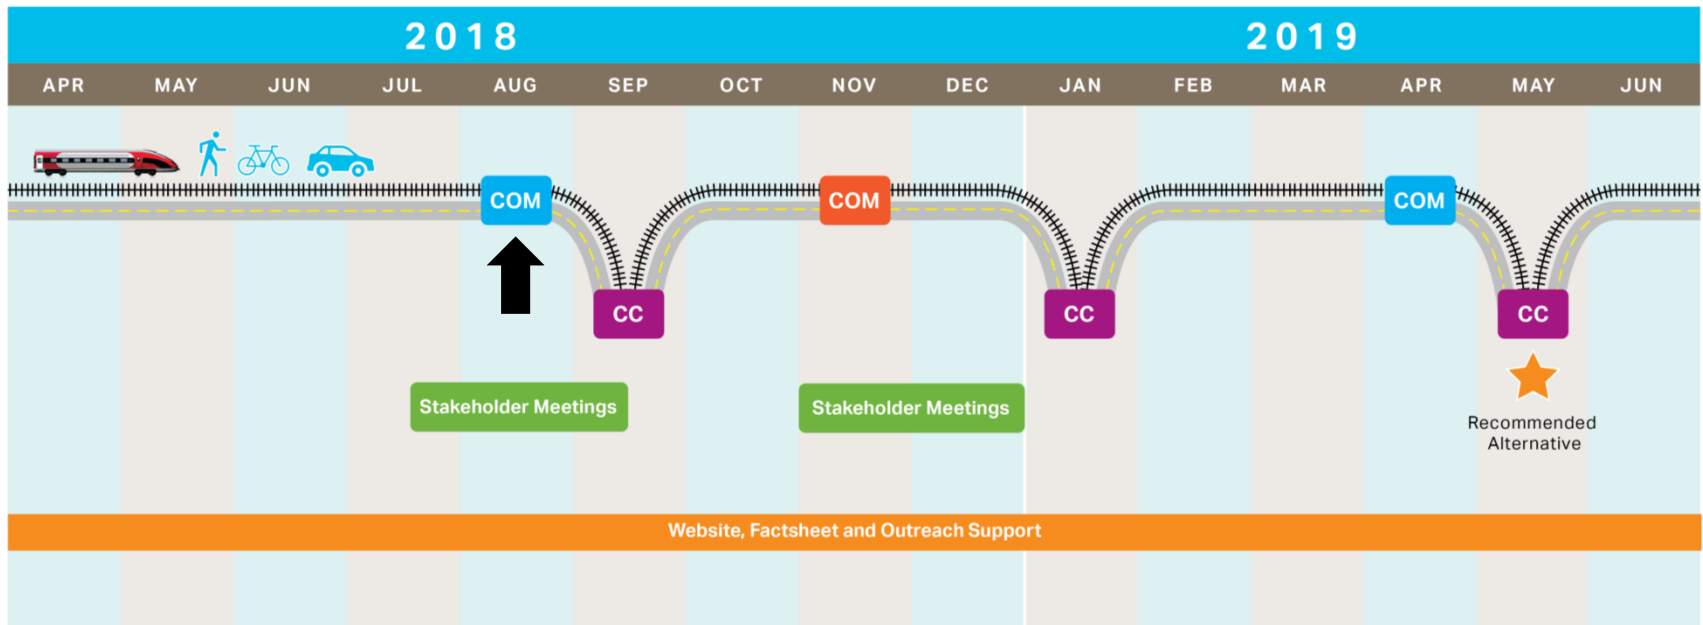

## South Linden Avenue and Scott Street Grade Separation Planning Study

# Next Steps

-  Combined City Community Meeting (2, with South San Francisco **and** San Bruno)
-  City Council Meeting (3 each per city)
-  Single City Community Meeting (1 each per city)
-  Recommended Alternative—Advance to Environmental Clearance
-  Today's Meeting

## South Linden Avenue and Scott Street Grade Separation Planning Study

Thank you

The background is a solid blue color. On the right side, there are several thin, white, intersecting lines that create a geometric pattern of triangles and quadrilaterals. The lines are thin and extend across the right half of the image.
