

REQUIREMENTS FOR WASTE HAULER DISCHARGE PERMIT APPLICATION

Waste Hauler Discharge Requirements:

Application Fee: \$400.00

Must Sample For*:

1. COD
2. TSS
3. pH
4. VOCs (BETX, MTBE and Tetrachloroethene)
5. Metals (CAM 17) -must be reported in micrograms.
6. Flashpoint
7. TPH- gas and diesel

*Results must fall within City of SSF Local Limits (attached), with the exception of TPH – which may require treatment/filtration prior to discharge if levels are extremely high.

Flow Requirements:

Waste Hauler Discharge – Permitted waste shall be discharged into the designated pit, located near the headworks at the Water Quality Control Plant (WQCP), located at 195 Belle Air Road, South San Francisco, CA 94080.

Permittee must record and submit project discharge volumes for billing purposes. The total volume (gallons) of each discharge shall be entered into the log sheet located adjacent to the discharge point by the driver.

Discharge will be billed to the project at the current Industrial Surcharge (currently \$6.97/HCF).

Once we received the data, application and permit fee, the request will be reviewed and if accepted, a permit will be issued. Standard TAT for permit issuance is 72 hours.
